Brideshore SRL is the Dominican subsidiary of the F.I.L.A. Group.

The vacancy is based in La Romana, Dominican Republic.

### **Product Engineer:**

As Product Engineer, you will help to reinvent Arts & Craft products!

You have a deep interest for Materials Science and for Manufacturing Processes and Applications.

You will design, analyse and prototype new concepts.

You will work to scale that prototype, though materials and construction techniques and processes.

You will plan and track the development schedule of products, ensuring timely execution.

You will own specifications, requirements and basic data set-up.

You have a service mentality and continually seek solutions that support your customers.

You will work with and gain exposure to different functions of the company: Marketing, Material Sourcing, Manufacturing, Quality Assurance, Finance, Managing Director.

You will work with autonomy and will be measured by results achieved.

#### **Basic Qualification:**

- Degree in Engineering, preferably Materials Engineering.
- Command of Solidworks, Photoshop
- Deep interest for manufacturing processes and applications

Competitive package of salary and benefits available.
