REPÚBLICA DOMINICANA

MESSAGE FROM THE MINISTER OF INDUSTRY, COMMERCE AND MIPYMES

EDUARDO SANZ LOVATÓN

A sector driving the Dominican future

Now a days Free zones are a concrete expression of what we can achieve when we align vision, work, and commitment to the people. Behind every advance there are real stories of progress that reaffirm that we are moving in the right direction.

In 2025, the sector once again demonstrated its strength. In a challenging global environment, the Dominican Republic has managed to maintain its competitiveness, attract investment, and expand its operations. This performance is not a coincidence; it responds to a clear policy in support of productive development, in which the National Council of Export Free Zones has played a key role in organizing, facilitating, and projecting the sector's growth.

There is one outcome we must highlight, it is the impact on people. In 2025, free zones generated around 200 to 237 direct jobs across the country, consolidating themselves as one of the main drivers of formal employment in the Dominican economy. Of this total, 53% corresponds to women, which demonstrates the sector's contribution to labor inclusion and to strengthening the economic autonomy of thousands of Dominican women.

Behind every job there is stability, opportunity, and a better quality of life for families. In addition, the sustained growth of the sector has made it possible to expand opportunities for young people, technicians, and professionals, reflecting the evolution of free zones toward increasingly specialized and competitive activities.

At the same time, our exports continue to strengthen the country's presence in international markets. We are not only exporting more; we are exporting better. Sectors such as textiles and tobacco, which have historically been fundamental in generating employment and exports, are now complemented by more sophisticated industries such as medical and pharmaceutical products, which account for 34% of the sector's exports, and electrical and electronic products, with a 13.7% share. This combination has made it possible to build a broader, more diversified, and resilient productive base, capable of serving different markets and global value chains.

It is also important to highlight how this growth is connected to the rest of the economy. The productive linkages between free zones and local companies have shown significant expansion in recent years, exceeding RD$150 billion in 2025. This reflects a greater integration of the sector with the national economy and the increasing participation of Dominican suppliers in export-related value chains.

These results reflect a firm decision: to bet on a model that generates real opportunities for everyone. Under the leadership of President Luis Abinader Corona, we will continue promoting policies that strengthen trust, investment, and productive development.

The challenge now is clear: not to become complacent. We must continue strengthening this sector, making it more innovative and sustainable, so that its growth continues to translate into more opportunities and a better quality of life for all Dominicans.

2025 STATISTICS REPORT FREE ZONES

PRESENTATION

It is my honor to present this new edition of the 2025 Statistical Report of the Free Zones Sector, a publication that rigorously and transparently captures the evolution of the main variables that define the economic and social performance of this strategic sector for the Dominican Republic.

The data made available to the country through this report once again confirm the decisive role of free zones as a driver of economic growth, the generation of quality employment, and the strengthening of the national export apparatus. This document constitutes a key tool for analysis, decision-making, and the formulation of public policies aimed at the sustainable development of the sector.

In this edition, users will find detailed and structured information on fundamental indicators such as employment, the number of operating companies, exports, local expenditures, investment, warehouse space in use, among others. The systematic presentation of these statistics allows for historical comparisons, trend evaluation, and a more precise assessment of the real impact of free zones on the national economy, while always guaranteeing the confidentiality of business information.

Beyond the figures, the free zones sector represents concrete opportunities for thousands of Dominican families. In 2025, approximately 200,237 individuals were directly employed by this sector, reflecting its significant contribution to the labor market, productive inclusion, and social well-being in the country.

This is also an opportune moment to express our sincere appreciation for the firm support of national authorities. In particular, we recognize the leadership of the President of the Republic, Luis Abinader Corona, as well as the commitment of the Minister of Industry, Commerce and MSMEs, Eduardo Sanz Lovatón, who have fostered a favorable environment for investment, competitiveness, and export development. The results presented today are the result of clear public policies aimed at strengthening legal certainty and consolidating the confidence of both national and foreign investors.

Finally, I would like to highlight that this report is the result of an interinstitutional effort. We appreciate the valuable support of the Central Bank of the Dominican Republic (BC), Social Security Treasury (TSS), the General Directorate of Customs (DGA), and the National Institute for Technical and Vocational Training (INFOTEP). We also extend our recognition to the companies and free zone parks whose collaboration has been essential for the collection, validation, and quality of the information presented here.

We reaffirm our commitment to transparency, continuous improvement, and the strengthening of the free zones sector as a pillar of the economic and social development of the Dominican Republic.

BEHAVIOR OF KEY VARIABLES

FREE ZONES

Free zones sector has consolidated the Dominican Republic as one of the best-performing countries in terms of direct job creation and export value, not only in Latin America but also globally. This positioning has been made possible by the country's political and social stability, strong macroeconomic management, adequate productive infrastructure, and a secure, competitive legal and regulatory framework that fosters investment.

As of the end of 2025, the country had 98 free zone parks and 858 companies in operation, generating 200,237 direct jobs and exports valued at US$8,548.6 million. These exports included 1,607 different products, with destinations in 148 countries across all five continents, allowing the sector to achieve significant positions in global rankings for various industrialized products.

Contribution of free zones to PIB 2016-2025

PARKS AND COMPANIES

At the end of 2025, the Dominican Republic recorded 98 free zone parks in operation, representing a 4.3% increase compared to the previous year. The regional distribution shows a higher concentration in the Northern Region, where 46.9% of the parks are located, followed by the Metropolitan Region with 21.4%, the Southern Region with 20.4%, and the Eastern Region, which accounts for the remaining 11.2%.

According to ownership structure, 77.6% of the parks are privately managed, 19.4% are publicly owned, and 3.1% operate under a mixed management scheme. Regarding companies, 2025 closed with 858 companies in operation, representing a 1.8% increase compared to the 843 companies registered in 2024. Of the total, 49.9% are located in the Northern Region, 25.5% in the Metropolitan Region, 13.8% in the Southern Region, and 10.8% in the Eastern Region.

In terms of location by type of park, 51.3% of the companies operate in private parks, 16.0% in public parks, 10.0% in mixed-management parks, and the remaining 22.7% correspond to special and service free zones.

By economic activity, the Tobacco and Derivatives subsector predominates with 19.8% of companies, followed by Call Centers/BPO (13.3%), Services (11.9%), Apparel and Textiles (11.7%), Agro-industrial Products (6.9%), Trading (5.4%), Medical and Pharmaceutical Products (4.9%), Cardboard, Printing, and Stationery (3.6%), and Electrical and Electronic Products (3.1%). The remaining 19.4% corresponds to other sector activities.

GENERATED EMPLOYMENT

EMPLOYMENT GENERATED

During 2025, the free zones sector remained one of the main generators of direct employment in the Dominican economy. By the end of the period, a total of 200,237 direct jobs were recorded, representing an increase of 0.8% compared to 2024 and the highest level of employment historically registered by the sector.

By economic activity, the highest concentration of employment is observed in Tobacco and Derivatives, with 38,622 jobs (19.3%), followed by Call Centers/ BPO (37,218 jobs, 18.6%); Apparel and Textiles (34,321 jobs, 17.1%); Medical and Pharmaceutical Products (33,454 jobs, 16.7%); Electrical and Electronic Products (10,216 jobs, 5.1%); Services (8,749 jobs, 4.4%); Footwear and Components (5,782 jobs, 2.9%); and Plastic Products (5,544 jobs, 2.8%). The remaining 13.1% (26,231 jobs) corresponds to other activities.

Geographically, 36.9% of jobs are generated in the Northern Region, 35.5% in the Metropolitan Region, 16.1% in the Southern Region, and 11.5% in the Eastern Region. By occupational category, 62.7% corresponds to operational workers, 26.2% to technicians, and 11.2% to administrative staff.

ACCUMULATED INVESTMENT

By the end of 2025, cumulative investment in the free zones sector totaled US$8.17 billion, representing a 5.6% increase compared to 2024.

The United States remained the leading source of investment, contributing 32.0% of the total (US$2.61 billion), followed by the Dominican Republic with 22.4% (US$1.83 billion). Other key investor countries included Germany (7.6%; US$622.3 million), the United Kingdom (5.7%; US$465.2 million), Switzerland (5.7%; US$462.7 million), and Canada (3.4%; US$281.5 million). Additional investment originated from countries such as China, Spain, Denmark, and Sweden, while the remaining 12.8% (US$1.05 billion) was distributed among 45 other countries.

From a sectoral perspective, investment was primarily concentrated in Medical and Pharmaceutical Products (28.9%), Tobacco and Tobacco Derivatives (21.5%), Apparel and Textiles (7.5%), Call Centers/BPO Services (6.8%), and Agro-industrial Products (6.5%). The remainder was allocated across a range of other free zone subsectors.

GLOSSARY OFTERMS

Economic Activity
Classification of a company's production or service operations based on processes, inputs, and final products.The International Standard Industrial Classification (ISIC) is used in the country.
Source: National Council of Export FreeTrade Zones (CNZFE).

BPO (Business Process Outsourcing)
A service subsector in which a company delegates business processes (such as technical support, accounting, or customer service) to an external provider under the free trade zone regime.
Source: International Standards onTrade in Services.

National Council of Export FreeTrade Zones (CNZFE)
The governing government body responsible for the regulation, promotion, and supervision of the free trade zone regime in the Dominican Republic.
Source: Law No. 8-90 on the Promotion of FreeTrade Zones.

Production Linkage
A process whereby free trade zone companies integrate goods or services produced by local market (domestic market) suppliers into their value chain.
Source: Ministry of Industry, Commerce and MSMEs (MICM).

Operating Company
A legal entity authorized to acquire, develop, and manage the logistics infrastructure of a free trade zone park, providing necessary services to the companies established there.
Source: Implementing Regulations for Law 8-90.

Projected jobs, investment, and foreign currency earnings
Estimated indicators used to assess the potential economic impact of companies applying for the free trade zone regime, taking into account job creation, capital investment, and expected foreign currency revenue from exports.
Source: Implementing Regulations for Law 8-90.

Local Expenses
Total value of purchases of goods and services (electricity, telecommunications, water service, etc.) made by companies in the sector from suppliers within the Dominican territory.
Source: National Accounts Methodology of the Central Bank of the D.R.

Industrial unit
Roofed physical building within a free zone park, designed to house manufacturing processes or service centers, whose capacity is measured in square feet.
Source: CNZFE Infrastructure Regulations.

GDP (Sector Contribution)
Indicator measuring the weight of the free trade zone sector's Gross Value Added relative to the country's total Gross Domestic Product.
Source: Central Bank of the Dominican Republic.

FreeTrade Zone Regime
Legal and fiscal framework granting tax exemptions and customs facilitations to companies producing goods or services primarily destined for export.
Source: Law No. 8-90.

Unified Planning Regions
Official territorial divisions established by the Dominican State to uniformly organize the planning, administration, public investment, and sustainable development of the national territory.
Source: Law No. 345-22.

Absolute Variation
The direct numerical difference between the value of an indicator in a specific year (e.g., 2025) and the immediately preceding year.
Source: CNZFE Statistical Indicators Methodology.

Relative Variation
A percentage expression of the change in an indicator between two periods, allowing for the measurement of the sector's growth or decline rate.
Source: CNZFE Statistical Indicators Methodology.

Special Free Trade Zone (ZFE)
A classification granted to companies that, due to the nature of their production process or proximity to natural resources, operate outside the boundaries of an industrial park.
Source: Law No. 8-90.

Services Free Trade Zone (ZFS)
A classification granted to companies operating under the free trade zone regime for the establishment of industrial or service enterprises that carry out high-tech or specialized activities. Their establishment may be subject to specific regulations by the Executive Branch—particularly within the National District—and they are characterized by the requirement for advanced processes and highly qualified technical or professional personnel.
